

## **Financial Aid from the Welfare Dept. of State Govt. to the SC/ST/OBC students of the college.**

### Objectives of the Practice:

It is an area of rural people which is comprised of ST, SC and other Backward classes. The socio-economic situation of the people is highly vulnerable. The main objectives of the college is to equip them with all facilities and resources of educational support to the students who can achieve their desirous goals of life. The following assistance by the welfare department ensures the outreach of higher education to the poor students of the area. BNJ Degree College has sound practice to obtaine the individual profile of each students who get admission for various courses that college offer to students coming from the rural and remote areas of plateau with low economic back ground and meager income. Parents of such students are unable to provide them viable and required financial support because of

So, the noble objectives of the practice are:

- To extend financial aid to the poor students, especially from the rural background to save them from drop out of their studies/courses owing to their poverty.
- To ensure scholarship sponsored by state government to support financially all the deserving poor students without any discrimination of caste, creed or gender.
- To promote the sense of 'equality' and friendship among the students
- To impart the values of 'generosity' 'civics' and a 'sense of social responsibility' among the students.
- College is also planning with University to introduce job oriented courses and equip them with the skill of entrepreneurship to sort out the problem of unemployment. The expected outcome is that the students should be able to complete their degrees with good marks. The beneficiaries should get help to rise in their career and get opportunity to stand equally in the society.

### The Context:

- BNJ college ensures that, all the documents required for scholarship grant from the welfare department of state govt. are verified and requirements met for processing of the scholarship form while filling the online form.
- Each and every eligible students get scholarship without any documents issues.
- College Teaching and Non-teaching staff are generous to cooperate the students in every circumstances, specifically in money matters while students are really in extreme need.

Finance is key and backbone for academic activities and pursuing Higher Education. Our college is opened with the vision to liberate people from the darkness of illiteracy in deep dark tribal area. We all teaching and non teaching staff are always in step forward to help such students who are unable to pay fees or other charges of college. We are in practice to raise funds from ourselves and help such needy students. Apart from that, we ensure that

every student gets their stipend and other benefits in time which is provided or sponsored by the government agencies.

#### The Practice:

BNJ college is located in Sisai, Gumla which has been a long history of frequent droughts and famines. It has ravaged the rural life throwing the people into miserable conditions of abject poverty, illiteracy and ill-health. In a situation of such dire poverty, whatever meagre resources available are used primarily to make both ends meet. So, sending their children to the town for higher education becomes almost impossibility for the poor parents in the rural areas, in the context of higher education demanding higher amounts of money. Though, sometimes, they do venture to admit their children to colleges in the town, they are unable to give sustained financial support throughout the course of study because agriculture, being a gamble with rain in the district of Gumla, is not a source of assured income. So, it is evident that without financial support from an external source or government assistance, the rural youth cannot hope to successfully complete their higher studies. The above problems, true to its legacy of pro-poor-student attitude since its inception of the college, has taken a firm resolve to extend all possible financial support to the deserving students and help them to realize their fond dream of acquiring higher education. The financial aid from government scholarship to support all the deserving poor students without any discrimination of caste, creed or gender. The students whose parents do not support them from their own resources. 'Poverty is bane on man' but our generosity and helping attitude counter down it to a lower level.

#### Evidence of Success:

The success of our efforts to avail the scholarship from the state government in session wise can be seen in the details available on our website [www.bnjcollegesaisai.org](http://www.bnjcollegesaisai.org). Besides, on Humanitarian grounds financial help is provided by teaching and non teaching staff in times of need. We have a single motto to provide every means of help and support to tribal belt students to encourage them for higher education and avail the better opportunities in life.

### **Best Practices - II**

#### **Title of the Practice:**

#### **Performances and participation of students in Sports and extension activities**

Our students regularly participate in inter-colleges, inter-universities, state level and national level. In these games, the performance of our students are very appreciable. The boys and the girls team manage to bagged surprise trophies and medals for their outstanding performance in several sport events.

#### **Objectives of the Practice:**

The main objective of promotion of sports and games is to equip the students with both, physical and mental well being. As Aristotle says that 'sound body has sound mind'. Youth only can bring transformation in the country and state. Now, sports offers reservation

in jobs and in academy admission too. State level champion secure their government job with prize and honour.

BNJ College, has proven records of numerous games in which college students got recognition, fame, name with awards and rewards too, of which records are available in the college register and same achievements' abstract is available in below:

### **The Practice :**

BNJ College has maintained the sound practices for boys and girls students and encouraged them time to time to take training of games and participate in. Our sports committee is always ready to arrange funds from university and keep to have quality of playing kits for various games.

Girls students get special attention, safety and care while participation in out campus games. Game instructor is always ready to groom up our students and instil the skills of success. Practice is the key factor of success. We motivate our students to do their best in the games in which they participate. As per tribal area, students have little exposure of various kind of games comparatively to city based institutions. The game options are very limited to them. But, College is trying to give maximum exposure of games and arrangement of its training. Our college gives equally importance to both: academic excellence and sports spirit as both are jewel to bearing human character. As per our perception, it is clear to see that sports play vital role to shaping students character. Sports spirit release among the students a sense of responsibility, humanity, discipline, cooperation and interdependence in achievement of collective goal.

We impart such moral values that restore humanity at first without having any distinction of caste, creed or ethnicity, and it is possible through the real spirit of sports. Social harmony is becoming the challenge in the society which can be restored by valuing the sport culture.

### **Evidence of Success:**

Our principal's office having number of shelves all filled with trophies of mementos of several years reflect the success of our students in sports. As we have limited resources in the college campus. The locality is the key factor to slow growth in both academy and sports too. Jharkhand is a poor state in spite of having rich resources of minerals. After separation, state is fighting with naxalite and bad social elements continuously. But, we are seeing that the state is transforming slowly and gradually. The literacy rate is growing rapidly. The industrial and institutional sectors are also developing.

The following points needs attention for further development of sports:

- To avail a separate fund allocation to sports development.
- For promotion of sports culture, government must give scholarship for physical fitness and well being of sports cadets.
- Sports activities must be mandatory to each and every student.

- In issuing the certificate, Sports activities reflect the students capability and ability in it.
- Government should recognized such remote colleges and institutions which are working in adverse situation. To encourage them with availability of infrastructural and promotional aid.
- There is lack of Sports Stadium and trainer to focus on sports activities.

In spite of all these lacunae, our students are doing our best in available resources.
